Most of the online websites are not Authorised reseller of the manufacturer. It may interrupt the warranty services of your product. Also, the purchase through distant reseller can trouble you more than the financial benefits you would get by dealing through them.

It is advisable to purchase locally through company authorised dealers/resellers only. Our association can also help you in mediating, if you have made your purchase through genuine members of the local IT association.

With the spirit of togetherness since 2002 !!
